

## 1251.Average Selling Price

13 July 2025 10:40 PM

Column Name	Type
product_id	int
start_date	date
end_date	date
price	int

(product\_id, start\_date, end\_date) is the primary key (combination of columns with unique values) for this table.  
Each row of this table indicates the price of the product\_id in the period from start\_date to end\_date.  
For each product\_id there will be no two overlapping periods. That means there will be no two intersecting periods for the same product\_id.

Column Name	Type
product_id	int
purchase_date	date
units	int

This table may contain duplicate rows.  
Each row of this table indicates the date, units, and product\_id of each product sold.

Prices table:

product_id	start_date	end_date	price
1	2019-02-17	2019-02-28	5
1	2019-03-01	2019-03-22	20
2	2019-02-01	2019-02-20	15
2	2019-02-21	2019-03-31	30

UnitsSold table:

product_id	purchase_date	units
1	2019-02-25	100
1	2019-03-01	15
2	2019-02-10	200
2	2019-03-22	30

product_id	average_price
1	6.96
2	16.96

Average selling price = Total Price of Product / Number of products sold.  
Average selling price for product 1 =  $((100 * 5) + (15 * 20)) / 115 = 6.96$

Average selling price for product 2 =  $((200 * 15) + (30 * 30)) / 230 = 16.96$
